PTL progres, s.r.o. is a family company that was established in 1996 in Chomutov. From its beginning its main customers were German companies, particularly from the automotive industry. From 1998 the core production programme was formed by machining of smaller components of production lines and machinery and over the years, together with the purchase of new machines and technologies, the production programme expanded to today's form when, thanks to CNC machines, we offer a series production of shape-complicated parts.

We have customers from Czech Republic as well as from abroad. References are provided on request.

We believe that we are able to satisfy your demanding expectations and we are looking forward to possible cooperation. If you are interested in a non-binding offer, do not hesitate to [contact us](#).
